DATA ANALYST INTERNSHIP PORTFOLIO

Task 5 — Capstone Integration & Portfolio Finalization

Prepared by: Venkat Akhil

College: Andhra University College of Engineering

Domain: Data Analytics

This document is a PDF overview of the master portfolio. On GitHub, also create a real **README.md** file because a PDF does not replace the README requirement.

1. About Me

I am a B.Tech Computer Science and Engineering student interested in data analytics, Python programming, data visualization, and artificial intelligence.

2. Portfolio Purpose

This master portfolio brings together internship assignments, project links, technical skills, and learning reflections in one place. It should make the completed work easy for a reviewer to locate and understand.

3. Internship Tasks

Task 1 — NGO Research and Data Collection: Research NGOs working in India and organize the information in a structured dataset or report. **Repository:** [ADD TASK 1 LINK]

Task 2 — AI-Powered Data Analysis: Analyze a social-impact topic and document the method, findings, and recommendations. **Repository:** [ADD TASK 2 LINK]

Task 3 — Volunteer Opportunity Data Compilation: Compile volunteer opportunities, internships, or fellowships in India. **Repository:** [ADD TASK 3 LINK]

Task 4 — Data Analysis Project: Include the actual dataset, code, analysis results, and documentation. **Repository:** [ADD TASK 4 LINK]

4. Technical Skills

Python; Pandas and NumPy; data cleaning and exploratory data analysis; data visualization; SQL and spreadsheets; Git and GitHub; reporting and presentation. Keep only skills you can accurately explain.

5. Final Presentation and Video

Final presentation: [ADD PRESENTATION LINK]
LinkedIn walkthrough video (3–5 minutes): [ADD LINK AFTER PUBLISHING]

6. Final Review

Replace all placeholders with actual links, add or link the completed Task 1–4 files, review the content for accuracy, and publish the required walkthrough video.
