LINKEDIN WALKTHROUGH VIDEO SCRIPT

Target length: 3–5 minutes

Prepared by: Venkat Akhil

Before recording

Open your master GitHub repository and the completed Task 1–4 repositories. Replace all placeholders with real links. Show only files and results you actually completed.

0:00–0:25 | Introduction

Hello, my name is Venkat Akhil. I am pursuing B.Tech in Computer Science and Engineering at Andhra University College of Engineering. In this video, I will present my Data Analytics Internship Portfolio and summarize my work and learning.

0:25–0:55 | Master portfolio

This is my master GitHub repository. The README provides an overview of the internship, links to the individual tasks, technical skills, key learnings, and the final presentation.

0:55–1:35 | Task 1 — NGO research

Task 1 focused on researching NGOs working in India and organizing the information. I will show my completed spreadsheet or report and explain how the information is organized.

1:35–2:10 | Task 2 — AI-powered analysis

Task 2 focused on analyzing a social-impact topic and documenting findings. I will explain the topic, approach, and conclusions supported by my report.

2:10–2:45 | Task 3 — Volunteer opportunities

Task 3 focused on compiling volunteer opportunities, internships, or fellowships in India. I will show the dataset and explain how its information is structured.

2:45–3:25 | Task 4 — Data analysis project

Task 4 involved a data analysis project. I will show the project files, dataset, workflow, and key findings from my actual work.

3:25–4:10 | Skills and learning

Across these tasks, I practiced organizing information, documenting work, analyzing data, and presenting findings. I will mention only tools I used and can explain confidently.

4:10–4:35 | Conclusion

This portfolio brings my internship tasks together in one place. Thank you for watching. You can find the project links in the README of my master GitHub repository.

After recording

Keep the final video between 3 and 5 minutes, publish it on LinkedIn, tag the organization as required by the internship instructions, and add the video post URL to your master README.
