Task 5 – GitHub README Guide

ApexPlanet Data Analytics Internship | Capstone Integration & Portfolio Finalization

What is README.md?

README.md is the main introduction page of a GitHub repository. GitHub displays it on the repository homepage. For Task 5, use it to explain your portfolio, link Tasks 1–4, list tools and learnings, and point to your presentation and walkthrough video.

Suggested repository name

```
ApexPlanet-Task5-Portfolio-Finalization
```

README content to use

Copy the following template into a real file named **README.md** in your GitHub repository. Replace every placeholder with your actual links and details before submitting.

```
# ApexPlanet Data Analytics Internship – Task 5

## Capstone Integration & Portfolio Finalization

### About This Repository
This repository brings together my Data Analytics internship work and summarizes the
projects, tools, and skills developed across Tasks 1–4.

### Internship Tasks
- **Task 1 – NGO Research & Data Collection:** [Add Task 1 repository or file link]
- **Task 2 – AI-Powered Data Analysis Report:** [Add Task 2 repository or file link]
- **Task 3 – Volunteer Opportunity Data Compilation:** [Add Task 3 repository or file link]
- **Task 4 – Data Analytics Project:** [Add Task 4 repository link]

### Tools and Technologies
List only the tools you actually used, for example:
- Python
- Pandas and NumPy
- Matplotlib and Seaborn
- Excel / Google Sheets
- AI tools used for analysis (name the tools you actually used)

### Key Learnings
- Organizing and documenting project files
- Exploring and analyzing data
- Presenting findings clearly
- Building a portfolio and using GitHub to share work

### Final Presentation
[Add the link to your final presentation PDF or PPTX]

### Portfolio Walkthrough Video
[Add the LinkedIn post or video link after publishing it]

### Author
Venkat Akhil
B.Tech CSE, Andhra University College of Engineering

---
**Note:** Replace all bracketed placeholders with working links. Do not leave example or
placeholder links in the final submission.
```

How to add README.md on GitHub

1. Open your Task 5 repository on GitHub.
2. Select Add file → Create new file.
3. Enter README.md as the filename.
4. Copy the template content into the editor and replace the placeholders.
5. Select Commit changes to save it.
6. Open the repository homepage and check that the README appears correctly.

Important submission note

This PDF is a guide/template; it does not replace the actual README.md file on GitHub. Create and commit README.md in the repository, and add the real Task 1–4, presentation, and video links before final submission.
